

Shubham Baid

Senior AI Engineer | Multimodal LLMs, CV & Edge AI

Bengaluru, India · shubhambaid99@gmail.com · [linkedin.com/in/shubhambaid21](https://www.linkedin.com/in/shubhambaid21)

Professional Summary

AI Engineer with 4+ years of experience in Computer Vision, Generative AI, and Multimodal LLMs. Proven expertise in scalable deployment (1500+ cameras), agentic AI workflows, and edge optimization. Skilled in PyTorch, TensorFlow, OpenCV, CUDA, and edge inference (Jetson, TensorRT, NEON).

Core Skills

Computer Vision · Generative AI · Multimodal Models · LLMs · RAG · TensorRT · PyTorch · TensorFlow · OpenCV · CUDA · C++ · Python

Professional Experience

AI Engineer

CAFU · Jan 2025 – Apr 2025

- Designed agentic LLM-based content workflows: ↑ CTR 15%, ↓ manual copywriting by 50%.
- Improved ETA prediction system; reduced >5 min breaches by 42% across 3 months.
- Built autonomous B2B lead pipeline: 1,400+ prospects/month, 90% time reduction, improved CAC.

Senior AI Engineer

Avathon · May 2022 – Jan 2025

- Integrated multimodal LLMs with traditional CV pipelines to enhance model performance.
- Led deployment of VAIA School Safety Suite (firearm detection, person re-ID) across 100s of cameras.
- Built optimized CV pipelines for ARM hardware using NEON and quantization (↓ CPU usage by 50%).
- Created auto-image annotation tool with active learning to speed dataset prep and labeling.

Sr. AI Engineer / AI Engineer / Intern

Integration Wizards · Sep 2020 – May 2022

- Developed real-time ALPR system for CPU/GPU inference with high speed and accuracy.
- Onboarded various CV models into GPU pipelines for accelerated inference.

- Built custom models for PPE detection, fall-arrester detection, vehicle classification.
- Contributed to the company's acquisition by SparkCognition through core AI delivery.

Certifications & Education

Nvidia Jetson AI Specialist · TensorFlow Developer · Intel Edge AI
B.Tech Computer Science – REVA University (2017–2021)

Projects & Publications

- Transformer-based Text Assistant for content generation
- YOLOv3 model for Skin Burn Severity Classification
- Gamified Auto-Annotation Tool using Active Learning

Awards

Best Outgoing Student – REVA · Galactic Problem Solver · Hackfest Winner
